

Software Dependencies

Python (Raspberry Pi)

- `numpy`: Array slicing, boolean masks, `np.where`, `np.mean`
- `picamera2`: Camera configuration and frame acquisition
- `time`: Frame timing and delay loops
- `serial` (`pyserial`): Serial bus communication with Arduino

C++ (Arduino Nano)

- `Arduino.h`: Core microcontroller function definitions
- `Servo.h`: Servo pulse generation
- `Serial`: Serial bus communication and debugging

(Note: `OpenCV` will be utilised in the main code for colour masking)
